Tony Gaddis, Godfrey Muganda

Starting Out with Java: From Control Structures through Data Structures (3rd Edition) Tony Gaddis, Godfrey Muganda

For courses in computer science and programming

Starting Out with Java: From Control Structures through Data Structures provides a smooth introduction to programming with Java that moves fluidly from beginner to more advanced topics. The first half of the book is taught for a CS1 course and teaches fundamental programming and problem solving concepts, while the second half, meant for a CS2 course, teaches advanced topics, algorithms, and data structures.

The **Third Edition** is extremely flexible in its organization, which teaches programmers to implement data structures with or without generics. As with all text in Gaddis' *Starting Out* series, the tone is friendly, the material detailed, and major concepts easy to understand. With rich examples throughout, programmers learn to use Java through real programming practice.
