Rescue Robotics: DDT Project on Robots and Systems for Urban Search and Rescue

Rescue Robotics presents the most significant findings of the DDT Project on robots and systems for urban search and rescue. This project was launched by the Japanese government in 2002 with the aim of applying a wide variety of robotics technologies to find a solution to the problem of disaster response, especially urban search and rescue in large-scale earthquakes.

From 2002 to 2007 more than 100 researchers took part in the DDT Project, coming from a wide spectrum of research and development to make up four research groups: Aerial Robot Systems MU (Mission Unit), Information Infrastructure System MU, In-Rubble Robot System MU, and On-Rubble Robot System MU. This book discusses their development and testing of various robotic systems and technologies such as serpentine robots, tracked vehicles, intelligent human interface and data processing, as well as analysing and verifying the results of these experiments.

Rescue Robotics will be of interest to researchers and students, but will also prove useful for emergency response personnel. It offers an insight into the state of the art of rescue robotics and its readers will benefit from a knowledge of the advanced technologies involved in this field.

From reader reviews:

Lewis Manns:

This book entitled Rescue Robotics: DDT Project on Robots and Systems for Urban Search and Rescue to be one of several books that will best seller in this year, that is because when you read this guide you can get a lot of benefit in it. You will easily to buy this kind of book in the book retailer or you can order it by using online. The publisher of this book sells the e-book too. It makes you quickly to read this book, as you can read this book in your Smart phone. So there is no reason to you personally to past this publication from your list.

Mary Sylvester:

Typically the book Rescue Robotics: DDT Project on Robots and Systems for Urban Search and Rescue has a lot details on it. So when you check out this book you can get a lot of benefit. The book was authored by the very famous author. Mcdougal makes some research just before write this book. This book very easy to read you may get the point easily after reading this article book.

Clifford Jones:

Playing with family in a park, coming to see the coastal world or hanging out with buddies is thing that usually you may have done when you have spare time, subsequently why you don't try thing that really opposite from that. One activity that make you not sense tired but still relaxing, trilling like on roller coaster you already been ride on and with addition info. Even you love Rescue Robotics: DDT Project on Robots and Systems for Urban Search and Rescue, you can enjoy both. It is fine combination right, you still desire to miss it? What kind of hang type is it? Oh can happen its mind hangout people. What? Still don't buy it, oh come on its identified as reading friends.

James Ojeda:

In this period of time globalization it is important to someone to acquire information. The information will make a professional understand the condition of the world. The health of the world makes the information easier to share. You can find a lot of personal references to get information example: internet, classifieds, book, and soon. You will see that now, a lot of publisher this print many kinds of book. The particular book that recommended for your requirements is Rescue Robotics: DDT Project on Robots and Systems for Urban Search and Rescue this e-book consist a lot of the information in the condition of this world now. This particular book was represented how does the world has grown up. The terminology styles that writer require to explain it is easy to understand. The writer made some research when he makes this book. Here is why this book suited all of you.
