# Algorithms, Part II

*Robert Sedgewick, Kevin Wayne*

**Algorithms, Part II** Robert Sedgewick, Kevin Wayne

This book is Part II of the fourth edition of Robert Sedgewick and Kevin Wayne's *Algorithms*, the leading textbook on algorithms today, widely used in colleges and universities worldwide. Part II contains Chapters 4 through 6 of the book. The fourth edition of *Algorithms* surveys the most important computer algorithms currently in use and provides a full treatment of data structures and algorithms for sorting, searching, graph processing, and string processing -- including fifty algorithms every programmer should know. In this edition, new Java implementations are written in an accessible modular programming style, where all of the code is exposed to the reader and ready to use.

The algorithms in this book represent a body of knowledge developed over the last 50 years that has become indispensable, not just for professional programmers and computer science students but for any student with interests in science, mathematics, and engineering, not to mention students who use computation in the liberal arts.

The companion web site, [algs4.cs.princeton.edu](http://algs4.cs.princeton.edu) contains

- An online synopsis
- Full Java implementations
- Test data
- Exercises and answers
- Dynamic visualizations
- Lecture slides
- Programming assignments with checklists
- Links to related material

The MOOC related to this book is accessible via the "Online Course" link at [algs4.cs.princeton.edu](http://algs4.cs.princeton.edu). The course offers more than 100 video lecture segments that are integrated with the text, extensive online assessments, and the large-scale discussion forums that have proven so valuable. Offered each fall and spring, this course regularly attracts tens of thousands of registrants.

Robert Sedgewick and Kevin Wayne are developing a modern approach to disseminating knowledge that fully embraces technology, enabling people all around the world to discover new ways of learning and teaching. By integrating their textbook, online content, and MOOC, all at the state of the art, they have built a unique resource that greatly expands the breadth and depth of the educational experience.

### **From reader reviews:**

#### **Diane Williams:**

What do you think about book? It is just for students as they are still students or it for all people in the world, the particular best subject for that? Just simply you can be answered for that question above. Every person has various personality and hobby for each and every other. Don't to be obligated someone or something that they don't need do that. You must know how great in addition to important the book Algorithms, Part II. All type of book would you see on many resources. You can look for the internet options or other social media.

#### **Miguel Penix:**

In this 21st century, people become competitive in every single way. By being competitive currently, people have do something to make these survives, being in the middle of typically the crowded place and notice through surrounding. One thing that occasionally many people have underestimated the idea for a while is reading. That's why, by reading a reserve your ability to survive raise then having chance to remain than other is high. For you who want to start reading a book, we give you this Algorithms, Part II book as starter and daily reading reserve. Why, because this book is greater than just a book.

#### **Charles Towns:**

Often the book Algorithms, Part II has a lot info on it. So when you make sure to read this book you can get a lot of profit. The book was written by the very famous author. The writer makes some research ahead of write this book. This book very easy to read you can find the point easily after reading this article book.

#### **Brandi Johnson:**

Reading a book to become new life style in this calendar year; every people loves to go through a book. When you read a book you can get a wide range of benefit. When you read publications, you can improve your knowledge, since book has a lot of information in it. The information that you will get depend on what kinds of book that you have read. If you would like get information about your study, you can read education books, but if you act like you want to entertain yourself you can read a fiction books, these kinds of us novel, comics, as well as soon. The Algorithms, Part II provide you with new experience in reading through a book.
