Cereal Straw as a Resource for Sustainable Biomaterials and Biofuels: Chemistry, Extractives, Lignins, Hemicelluloses and Cellulose RunCang Sun

Materials from renewable resources are receiving increased attention, as leading industries and manufacturers attempt to replace declining petrochemical-based feedstocks with products derived from natural biomass, such as cereal straws. Cereal straws are expected to play an important role in the shift toward a sustainable economy, and a basic knowledge of the composition and structure of cereal straw is the key to using it wisely.

Cereal Straw as a Resource for Sustainable Biomaterials and Biofuels: Chemistry, Extractives, Lignins, Hemicelluloses and Cellulose provides an introduction to straw chemistry. Topics discussed include the structure, ultrastructure, and chemical composition of straw; the structure and isolation of extractives from the straw; the three main components of straw: cellulose, hemicelluloses, and lignins; and chemical modifications of straw for industrial applications.

This book will be helpful to scientists interested in the areas of natural resource management, environmental chemistry, plant chemistry, material science, polysaccharide chemistry, and lignin chemistry. It will also be of interest to academic and industrial scientists/researchers interested in novel applications of agricultural residues for industrial and/or recycling technologies.

- Provides the basics of straw composition and the structure of its cell walls
- Details the procedures required to fractionate straw components to produce chemical derivatives from straw cellulose, hemicelluloses, and lignins
- Elucidates new techniques for the production of biodegradable materials for the energy sector, chemical industry, and pulp and paper business

From reader reviews:

Ida Johnson:

This book untitled Cereal Straw as a Resource for Sustainable Biomaterials and Biofuels: Chemistry, Extractives, Lignins, Hemicelluloses and Cellulose to be one of several books which best seller in this year, this is because when you read this publication you can get a lot of benefit onto it. You will easily to buy this kind of book in the book shop or you can order it by using online. The publisher with this book sells the e-book too. It makes you more readily to read this book, as you can read this book in your Smartphone. So there is no reason to your account to past this guide from your list.

Mary Gilbert:

The particular book Cereal Straw as a Resource for Sustainable Biomaterials and Biofuels: Chemistry, Extractives, Lignins, Hemicelluloses and Cellulose will bring someone to the new experience of reading some sort of book. The author style to spell out the idea is very unique. When you try to find new book to study, this book very ideal to you. The book Cereal Straw as a Resource for Sustainable Biomaterials and Biofuels: Chemistry, Extractives, Lignins, Hemicelluloses and Cellulose is much recommended to you to see. You can also get the e-book in the official web site, so you can quicker to read the book.

Sylvia Alexander:

Reading a publication tends to be new life style on this era globalization. With looking at you can get a lot of information that can give you benefit in your life. Having book everyone in this world can share their idea. Books can also inspire a lot of people. A great deal of author can inspire their particular reader with their story as well as their experience. Not only the storyline that share in the ebooks. But also they write about the knowledge about something that you need example of this. How to get the good score toefl, or how to teach your sons or daughters, there are many kinds of book which exist now. The authors on this planet always try to improve their skill in writing, they also doing some investigation before they write for their book. One of them is this Cereal Straw as a Resource for Sustainable Biomaterials and Biofuels: Chemistry, Extractives, Lignins, Hemicelluloses and Cellulose.

John Day:

You can find this Cereal Straw as a Resource for Sustainable Biomaterials and Biofuels: Chemistry, Extractives, Lignins, Hemicelluloses and Cellulose by check out the bookstore or Mall. Just viewing or reviewing it could possibly to be your solve issue if you get difficulties to your knowledge. Kinds of this book are various. Not only through written or printed and also can you enjoy this book by e-book. In the modern era including now, you just looking by your local mobile phone and searching what their problem. Right now, choose your own personal ways to get more information about your e-book. It is most important to arrange you to ultimately make your knowledge are still revise. Let's try to choose appropriate ways for you.
