Emerging Trends And Challenges in Information Technology Management

Emerging Trends And Challenges in Information Technology Management

The field of information technology continues to impact more organizations worldwide as new technologies and applications are implemented to strengthen everyday business processes. Individuals within these organizations continue to face the challenge of developing and implementing the latest innovative programs that successfully apply information technology applications within various types and sizes of companies and businesses. "Emerging Trends and Challenges in Information Technology Management" presents the latest issues surrounding the management of information technology in organizations, and explains how these issues are addressed and used for the benefit of practitioners and educators around the world. These proceedings from the 17th Annual Information Resources Management Association (IRMA) International Conference provide knowledge related to the latest trends and challenges dealing with all aspects of information technology applications and management. Topics presented within the proceedings include: distance learning technologies, data warehousing and mining, information quality management, geographic information systems, knowledge management, information technology education, and many more. "Emerging Trends and Challenges in Information Technology Management" includes the latest research in the area of IT utilization and management, and supports those involved in the research and teaching of information technology aspects worldwide.
