MEMS for automotive and aerospace applications reviews the use of Micro-Electro-Mechanical-Systems (MEMS) in developing solutions to the unique challenges presented by the automotive and aerospace industries.

Part one explores MEMS for a variety of automotive applications. The role of MEMS in passenger safety and comfort, sensors for automotive vehicle stability control applications and automotive tire pressure monitoring systems are considered, along with pressure and flow sensors for engine management, and RF MEMS for automotive radar sensors. Part two then goes on to explore MEMS for aerospace applications, including devices for active drag reduction in aerospace applications, inertial navigation and structural health monitoring systems, and thrusters for nano- and pico-satellites. A selection of case studies are used to explore MEMS for harsh environment sensors in aerospace applications, before the book concludes by considering the use of MEMS in space exploration and exploitation.

With its distinguished editors and international team of expert contributors, MEMS for automotive and aerospace applications is a key tool for MEMS manufacturers and all scientists, engineers and academics working on MEMS and intelligent systems for transportation.

- Chapters consider the role of MEMS in a number of automotive applications, including passenger safety and comfort, vehicle stability and control
- MEMS for aerospace applications are also discussed, including active drag reduction, inertial navigation and structural health monitoring systems
- Presents a number of case studies exploring MEMS for harsh environment sensors in aerospace

### **From reader reviews:**

#### **David Bruce:**

Book is definitely written, printed, or highlighted for everything. You can learn everything you want by a book. Book has a different type. As we know that book is important issue to bring us around the world. Adjacent to that you can your reading expertise was fluently. A publication Mems for Automotive and Aerospace Applications (Woodhead Publishing Series in Electronic and Optical Materials) will make you to end up being smarter. You can feel more confidence if you can know about every thing. But some of you think which open or reading some sort of book make you bored. It's not make you fun. Why they are often thought like that? Have you looking for best book or acceptable book with you?

#### **David Peacock:**

What do you think about book? It is just for students because they're still students or the idea for all people in the world, what best subject for that? Just you can be answered for that problem above. Every person has several personality and hobby for each other. Don't to be forced someone or something that they don't want do that. You must know how great and also important the book Mems for Automotive and Aerospace Applications (Woodhead Publishing Series in Electronic and Optical Materials). All type of book can you see on many sources. You can look for the internet resources or other social media.

#### **Christopher Hendrick:**

Reading a book tends to be new life style within this era globalization. With reading through you can get a lot of information that can give you benefit in your life. Using book everyone in this world could share their idea. Ebooks can also inspire a lot of people. Plenty of author can inspire their reader with their story as well as their experience. Not only the storyplot that share in the guides. But also they write about the ability about something that you need case in point. How to get the good score toefl, or how to teach children, there are many kinds of book which exist now. The authors on earth always try to improve their skill in writing, they also doing some exploration before they write on their book. One of them is this Mems for Automotive and Aerospace Applications (Woodhead Publishing Series in Electronic and Optical Materials).

#### **Williams Carter:**

Many people said that they feel bored when they reading a guide. They are directly felt that when they get a half parts of the book. You can choose typically the book Mems for Automotive and Aerospace Applications (Woodhead Publishing Series in Electronic and Optical Materials) to make your personal reading is interesting. Your personal skill of reading ability is developing when you including reading. Try to choose simple book to make you enjoy to read it and mingle the sensation about book and studying especially. It is to be very first opinion for you to like to available a book and examine it. Beside that the e-book Mems for Automotive and Aerospace Applications (Woodhead Publishing Series in Electronic and Optical Materials) can to be your brand new friend when you're truly feel alone and confuse in doing what must you're doing of

their time.
