Old Fields: Dynamics and Restoration of Abandoned Farmland (The Science and Practice of Ecological Restoration Series) Richard J. Hobbs

Land abandonment is increasing as human influence on the globe intensifies and various ecological, social, and economic factors conspire to force the cessation of agriculture and other forms of land management. The “old fields” that result from abandonment have been the subject of much study, yet few attempts have been made to examine the larger questions raised by old field dynamics.

Old Fields brings together leading experts from around the world to synthesize past and current work on old fields, providing an up-to-date perspective on the ecological dynamics of abandoned land. The book gives readers a broad understanding of why agricultural land is abandoned, the factors that determine the ecological recovery of old fields, and how this understanding contributes to theoretical and applied ecology.

Twelve case studies from diverse geographical and climatic areas—including Australian rainforest, Brazilian Amazonia, New Jersey piedmont, and South African renosterveld—offer a global perspective on the causes and results of land abandonment. Concluding chapters consider the similarities and differences among the case studies, examine them in the context of ecological concepts, and discuss their relevance to the growing field of restoration ecology.

Old Fields is the first book to draw together studies on old fields from both a theoretical and practical perspective. It represents an important contribution to the development of theory on old field dynamics and the practice of ecological restoration on abandoned farmland, and the broader implications of old field dynamics to ecology and restoration.

From reader reviews:

Carrie Grogan:

Book is to be different for each and every grade. Book for children until finally adult are different content. To be sure that book is very important for all of us. The book Old Fields: Dynamics and Restoration of Abandoned Farmland (The Science and Practice of Ecological Restoration Series) had been making you to know about other know-how and of course you can take more information. It is quite advantages for you. The guide Old Fields: Dynamics and Restoration of Abandoned Farmland (The Science and Practice of Ecological Restoration Series) is not only giving you considerably more new information but also to become your friend when you sense bored. You can spend your own spend time to read your reserve. Try to make relationship with the book Old Fields: Dynamics and Restoration of Abandoned Farmland (The Science and Practice of Ecological Restoration Series). You never feel lose out for everything in the event you read some books.

Janie Ross:

As people who live in often the modest era should be up-date about what going on or facts even knowledge to make these people keep up with the era that is always change and make progress. Some of you maybe will certainly update themselves by examining books. It is a good choice for you but the problems coming to you is you don't know what kind you should start with. This Old Fields: Dynamics and Restoration of Abandoned Farmland (The Science and Practice of Ecological Restoration Series) is our recommendation so you keep up with the world. Why, as this book serves what you want and want in this era.

Daniel McDonald:

Reading a book to get new life style in this 12 months; every people loves to study a book. When you go through a book you can get a great deal of benefit. When you read guides, you can improve your knowledge, because book has a lot of information upon it. The information that you will get depend on what kinds of book that you have read. If you want to get information about your research, you can read education books, but if you want to entertain yourself look for a fiction books, these us novel, comics, as well as soon. The Old Fields: Dynamics and Restoration of Abandoned Farmland (The Science and Practice of Ecological Restoration Series) will give you new experience in reading through a book.

James Adcock:

It is possible to spend your free time to see this book this guide. This Old Fields: Dynamics and Restoration of Abandoned Farmland (The Science and Practice of Ecological Restoration Series) is simple to deliver you can read it in the playground, in the beach, train as well as soon. If you did not possess much space to bring often the printed book, you can buy the particular e-book. It is make you quicker to read it. You can save the book in your smart phone. Therefore there are a lot of benefits that you will get when you buy this book.
