Learn to read light in this complete course on the most important aspect of every photograph. Beginning with an overview of how digital cameras measure and record light, Michael Freeman goes on to explore the different ways to interact with existing light, whether it be the harsh, contrasty light of a midday sun or the flickering, ephemeral flames of candlelight and even teaches how to manipulate that existing light to your own creative ends with such essential tools as diffusers and reflectors. Readers will also learn how to control their own light sources, from setting up a home studio to adding that touch of fill flash that makes all the difference in an outdoor portrait. Equipped with these essential lighting skills, readers will learn to coax stunning images out of even the most challenging lighting conditions.
