Nonlinear Mechanics: A Supplement to Theoretical Mechanics of Particles and Continua (Dover Books on Physics)

Alexander L. Fetter, John Dirk Walecka

Nonlinear Mechanics: A Supplement to Theoretical Mechanics of Particles and Continua (Dover Books on Physics) Alexander L. Fetter, John Dirk Walecka

In their prior Dover book, *Theoretical Mechanics of Particles and Continua*, Alexander L. Fetter and John Dirk Walecka provided a lucid and self-contained account of classical mechanics, together with appropriate mathematical methods. This supplement — an update of that volume — offers a bridge to contemporary mechanics.

The original book's focus on continuum mechanics — with chapters on sound waves in fluids, surface waves on fluids, heat conduction, and viscous fluids — forms the basis for this supplement's discussion of nonlinear continuous systems. Topics include linearized stability analysis; a detailed examination of the Rayleigh-Bénard problem, from its formulation to issues of linearized theory of convective instability and expansion in Fourier modes; and the direct derivation of Lorenz equations for simple physical configuration. The first half of the original text deals with particle mechanics, and this supplement returns to the study of systems with a finite number of degrees of freedom. A concluding section presents a series of problems that reinforce the supplement's teachings.

From reader reviews:

Beverly Dyar:

The particular book Nonlinear Mechanics: A Supplement to Theoretical Mechanics of Particles and Continua (Dover Books on Physics) will bring you to the new experience of reading a book. The author style to spell out the idea is very unique. In the event you try to find new book to learn, this book very ideal to you. The book Nonlinear Mechanics: A Supplement to Theoretical Mechanics of Particles and Continua (Dover Books on Physics) is much recommended to you to study. You can also get the e-book through the official web site, so you can quicker to read the book.

Rene Defeo:

Do you have something that you want such as book? The book lovers usually prefer to pick book like comic, quick story and the biggest the first is novel. Now, why not attempting Nonlinear Mechanics: A Supplement to Theoretical Mechanics of Particles and Continua (Dover Books on Physics) that give your entertainment preference will be satisfied by simply reading this book. Reading addiction all over the world can be said as the way for people to know world a great deal better then how they react towards the world. It can't be mentioned constantly that reading behavior only for the geeky particular person but for all of you who wants to end up being success person. So , for all of you who want to start looking at as your good habit, you can pick Nonlinear Mechanics: A Supplement to Theoretical Mechanics of Particles and Continua (Dover Books on Physics) become your current starter.

Edna Spalding:

Reading a book being new life style in this season; every people loves to examine a book. When you read a book you can get a wide range of benefit. When you read ebooks, you can improve your knowledge, since book has a lot of information on it. The information that you will get depend on what forms of book that you have read. If you want to get information about your research, you can read education books, but if you act like you want to entertain yourself you can read a fiction books, these us novel, comics, in addition to soon. The Nonlinear Mechanics: A Supplement to Theoretical Mechanics of Particles and Continua (Dover Books on Physics) provide you with a new experience in examining a book.

Gordon Frederick:

What is your hobby? Have you heard this question when you got pupils? We believe that that issue was given by teacher for their students. Many kinds of hobby, Every person has different hobby. So you know that little person just like reading or as reading become their hobby. You need to know that reading is very important along with book as to be the issue. Book is important thing to add you knowledge, except your teacher or lecturer. You discover good news or update concerning something by book. Different categories of books that can you choose to use be your object. One of them is niagra Nonlinear Mechanics: A Supplement to Theoretical Mechanics of Particles and Continua (Dover Books on Physics).
