**SURGEON'S KNIFE - Head & Neck Incisions: An Atlas of Head & Neck Incisions** Dr Akheel Mohammad

This an old saying which says that Face, a part of body helps us to convey our thinking, feelings and other emotions. A Knife is a like a sword in surgeon's hand which gives life to his patients. This book is an atlas which shall cover all Incisions of Head & Neck region which will be a valuable piece of information for residents/specialists practising head & neck surgery. I hope my readers will feel the inspired raptures after reading this book. I have tried to cover all the incisions of particular region starting from the historical ones and till date with references. The understanding of the face as a compact dynamic emotional structure has been changed more during the last thirty years than during the last twenty thousand years. Surgeon's task is not only to incise the facial structures but also to rejuvenate it, and also to harmonize, enhance and symmetrize it. In order to achieve this, the very first step of placing a knife to make an incision needs a meticulous planning. This book shall help the young surgeon/ resident to know about various incisions, practice a safe and ethical surgery to avoid inadvertent complications. Planning an incision in facial region is an art and needs a proper knowledge about facial architecture. A wrong incision can make you land in legal problems. Hence this book will help you to get exposed to all incisions under one roof and I hope there is no other book other than by Sir Edward Ellis III which summarize all these incisions together. I wish you All the best in all your future endeavors and enjoy reading this Atlas.
