Exploring Creation with Biology (Textbook Only) Dr. Jay L. Wile, Marilyn F. Durnell

This course is designed to be the student's first high school science course. Typically, we recommend that the student take this course during the same year that he or she is taking Algebra 1. Exploring Creation with Biology is a college-prep biology course that provides a detailed introduction to the methods and concepts of general biology. With a strong emphasis on the vocabulary of biology, the course provides the student with a strong background in the scientific method, the five-kingdom classification scheme, microscopy, biochemistry, cellular biology, molecular and Mendelian genetics, evolution, dissection, and ecosystems. Please note that this course does not contain a discussion of human anatomy and physiology. (Most college biology professors do not consider human anatomy and physiology to be a part of a solid, college-prep biology course.) Anatomy is such a detailed subject that it merits an entire course. The second edition of the includes more color and higher-quality illustrations, access to additional online resources for more advanced learners, and an appendix of review questions covering the entire course. The high-quality hardcover student text contains all student material, study questions, laboratory exercises, and module study guides with color photos and illustrations. *This product is the textbook only of a two-volume set. A solutions and test manual is also needed in companion with the textbook.*

From reader reviews:

Mary Ayala:

What do you consider book? It is just for students since they're still students or that for all people in the world, the particular best subject for that? Just you can be answered for that problem above. Every person has diverse personality and hobby for each and every other. Don't to be pressured someone or something that they don't wish do that. You must know how great and important the book Exploring Creation with Biology (Textbook Only). All type of book could you see on many options. You can look for the internet solutions or other social media.

Kevin Swafford:

Information is provisions for anyone to get better life, information nowadays can get by anyone with everywhere. The information can be a expertise or any news even an issue. What people must be consider whenever those information which is within the former life are challenging be find than now could be taking seriously which one is appropriate to believe or which one typically the resource are convinced. If you get the unstable resource then you get it as your main information there will be huge disadvantage for you. All of those possibilities will not happen inside you if you take Exploring Creation with Biology (Textbook Only) as your daily resource information.

Joan Davis:

People live in this new day of lifestyle always make an effort to and must have the extra time or they will get great deal of stress from both everyday life and work. So , if we ask do people have time, we will say absolutely sure. People is human not only a robot. Then we ask again, what kind of activity do you have when the spare time coming to an individual of course your answer will probably unlimited right. Then do you try this one, reading textbooks. It can be your alternative inside spending your spare time, the book you have read is actually Exploring Creation with Biology (Textbook Only).

Tyrone Hogans:

What is your hobby? Have you heard in which question when you got pupils? We believe that that issue was given by teacher on their students. Many kinds of hobby, Every person has different hobby. And also you know that little person just like reading or as studying become their hobby. You need to know that reading is very important and also book as to be the thing. Book is important thing to include you knowledge, except your personal teacher or lecturer. You will find good news or update about something by book. Numerous books that can you choose to adopt be your object. One of them is niagra Exploring Creation with Biology (Textbook Only).
