On Becoming Baby Wise, Book Two: Parenting Your Five to Twelve-Month Old Through the Babyhood Transition Gary Ezzo, Robert Bucknam

It's reality-check time! You're at least four months into your tour of parenting, and the complexities of child training are starting to multiply. As your baby is growing physically, his mind is adapting with an increasing awareness to new sights, sounds and sensations. He can now interact with his material universe with greater attentiveness. Now feeding time is more than a biological response initiated by a baby's sucking reflex. For the five-month-old, meal times become a complex and conscious interaction between child and parent, food and drink, preference and need, likes and dislikes, must do and won't do! Watch out - big changes are coming to their world and yours!

In his 26th year in practice, join pediatrician Robert Bucknam, M.D. and co-author Gary Ezzo to discover the proven methods that more than 8 million parents have made their own with incredible success. The second half of your child's first year of life holds some of the most powerful windows into their cognitive and emotional growth and development.

"As a practicing pediatric neurologist, husband, and father, I fully endorse and highly recommend Babywise 11. The principles found in this book are immensely practical and universally applicable. If the principles of structure and routine found in this resource were widely applied in the early months and years as they should be, I would see far fewer patients over the age of two with behavioral deficiencies and neurologic challenges. "

--- Robert P. Turner, M.D. of Richmond, Virginia
