DIY Survival Hacks to Survive Anything

Outstanding DIY Household Survival Techniques

Have you ever wondered what it would be like to live on your own without anyone there to help you find food, water, and shelter?

Whether the thought of this happening frightens or excites you or maybe both, you should be prepared for the worst to happen. Natural disasters occur every year and thousands of people are left stranded without fresh water, food, and even shelter during a time when they really need it. Being prepared for something like this will ensure that you are one of the survivors rather than the people who have perished wondering if they could have been better equipped.

In this book, you will find information about how to:

- Find water and filter it as well as purify it to rid it of harmful bacteria, viruses, heavy metals, and chemical pollutants.
- Build a fire to stay warm, help with purifying water, and cook food using just a magnifying glass, a bottle of water, or different types of common household chemicals.
- Create a shelter using only what you can find in nature or a tarp.
- Find food using snares and fishing traps.
- How to tell if vegetation is poisonous or not, even if you don't know what the plant is.

- How to create your very own survival kit for when disaster strikes!
