## **A concise, updated guide to the 3GPP LTE Security Standardization specifications**

A welcome Revised Edition of the successful *LTE Security* addressing the security architecture for SAE/LTE, which is based on elements of the security architectures for GSM and 3G, but which needed a major redesign due to the significantly increased complexity, and different architectural and business requirements of fourth generation systems. The authors explain in detail the security mechanisms employed to meet these requirements. The specifications generated by standardization bodies only inform about how to implement the system (and this only to the extent required for interoperability), but almost never inform readers about why things are done the way they are. Furthermore, specifications tend to be readable only for a small group of experts and lack the context of the broader picture. The book fills this gap by providing first hand information from insiders who participated in decisively shaping SAE/LTE security in the relevant standardization body, 3GPP, and can therefore explain the rationale for design decisions in this area.

- A concise, fully updated guide to the 3GPP LTE Security Standardization specifications
- Describes the essential elements of LTE and SAE Security, written by leading experts who participated in decisively shaping SAE/LTE security in the relevant standardization body, 3GPP
- Explains the rationale behind the standards specifications giving readers a broader understanding of the context to these specifications
- Includes new chapters covering 3GPP work on system enhancements for MTC, plus application layer security in ETSI TC M2M and embedded smart card in ETSI SCP; Security for Machine-type Communication, Relay Node Security, and Future Challenges, including Voice over LTE, MTC, Home base stations, LIPA/SIPTO, and New Cryptographic Algorithms

Essential reading for System engineers, developers and people in technical sales working in the area of LTE and LTE security, communication engineers and software developers in mobile communication field.

### **From reader reviews:**

#### **Joe Vizcarra:**

Why don't make it to become your habit? Right now, try to prepare your time to do the important action, like looking for your favorite book and reading a e-book. Beside you can solve your problem; you can add your knowledge by the guide entitled LTE Security. Try to make the book LTE Security as your good friend. It means that it can for being your friend when you really feel alone and beside regarding course make you smarter than previously. Yeah, it is very fortunated in your case. The book makes you more confidence because you can know every thing by the book. So , let us make new experience and knowledge with this book.

#### **Katie Barry:**

In this 21st one hundred year, people become competitive in every way. By being competitive now, people have do something to make these people survives, being in the middle of often the crowded place and notice simply by surrounding. One thing that oftentimes many people have underestimated the idea for a while is reading. Yes, by reading a e-book your ability to survive boost then having chance to remain than other is high. For you who want to start reading some sort of book, we give you this particular LTE Security book as beginner and daily reading book. Why, because this book is greater than just a book.

#### **Patricia Ackermann:**

Are you kind of stressful person, only have 10 or 15 minute in your day to upgrading your mind skill or thinking skill possibly analytical thinking? Then you have problem with the book as compared to can satisfy your limited time to read it because all this time you only find book that need more time to be read. LTE Security can be your answer because it can be read by you actually who have those short time problems.

#### **Sarah Luis:**

Reading a book to be new life style in this year; every people loves to learn a book. When you go through a book you can get a great deal of benefit. When you read books, you can improve your knowledge, because book has a lot of information onto it. The information that you will get depend on what types of book that you have read. If you wish to get information about your examine, you can read education books, but if you want to entertain yourself you can read a fiction books, these kinds of us novel, comics, and also soon. The LTE Security will give you new experience in looking at a book.
