Physics in Biology and Medicine, Fourth Edition (Complementary Science)

Paul Davidovits

Physics in Biology and Medicine, Fourth Edition (Complementary Science) Paul Davidovits

Physics in Biology and Medicine, Fourth Edition explores concepts in physics as they apply to living systems. The discussion is organized into 18 chapters encompassing thermodynamics, electricity, optics, sound, solid mechanics, fluid mechanics, and atomic and nuclear physics. Each chapter provides a brief review of the background physics before focusing on the applications of physics to biology and medicine. The book describes biological systems and presents calculations of the forces exerted by muscles, as well as the maximum impact that can be sustained by a body without injury, the height from which a person can jump, the effect of an animals size on the speed at which it can run, and the circulation of blood in the body. Using the theory of fluids, the role of diffusion in the functioning of cells and the effect of surface tension on the growth of plants in soil are also analyzed. Using the principles of electricity, the conduction of impulses along the nervous system is investigated. Each section contains problems that explore and expand some of the concepts, and some of the techniques of physics and engineering are applied to the study of living systems. Moreover, the use of lasers in medical diagnostics and the applications of nanotechnology in biology and medicine are considered.

This book will be a valuable resource for students and professors of physics, biology, and medicine, as well as for applied health workers.

- Provides practical techniques for applying knowledge of physics to the study of living systems
- Presents material in a straight forward manner requiring very little background in physics or biology
- Includes many figures, examples and illustrative problems and appendices which provide convenient access to the most important concepts of mechanics, electricity, and optics in the body

From reader reviews:

Michael Floyd:

As people who live in the modest era should be revise about what going on or details even knowledge to make them keep up with the era that is certainly always change and progress. Some of you maybe will update themselves by looking at books. It is a good choice for you but the problems coming to a person is you don't know what type you should start with. This Physics in Biology and Medicine, Fourth Edition (Complementary Science) is our recommendation so you keep up with the world. Why, because this book serves what you want and want in this era.

Joyce Greenberg:

The reason? Because this Physics in Biology and Medicine, Fourth Edition (Complementary Science) is an unordinary book that the inside of the guide waiting for you to snap this but latter it will distress you with the secret that inside. Reading this book beside it was fantastic author who else write the book in such wonderful way makes the content on the inside easier to understand, entertaining way but still convey the meaning entirely. So , it is good for you for not hesitating having this any more or you going to regret it. This book will give you a lot of gains than the other book have got such as help improving your skill and your critical thinking technique. So , still want to hesitate having that book? If I ended up you I will go to the guide store hurriedly.

Dennis Gaines:

Beside this particular Physics in Biology and Medicine, Fourth Edition (Complementary Science) in your phone, it can give you a way to get nearer to the new knowledge or information. The information and the knowledge you may got here is fresh from your oven so don't end up being worry if you feel like an old people live in narrow small town. It is good thing to have Physics in Biology and Medicine, Fourth Edition (Complementary Science) because this book offers for you readable information. Do you oftentimes have book but you don't get what it's interesting features of. Oh come on, that wil happen if you have this in your hand. The Enjoyable agreement here cannot be questionable, similar to treasuring beautiful island. So do you still want to miss that? Find this book in addition to read it from right now!

Debra Unger:

This Physics in Biology and Medicine, Fourth Edition (Complementary Science) is brand-new way for you who has fascination to look for some information mainly because it relief your hunger info. Getting deeper you on it getting knowledge more you know otherwise you who still having small amount of digest in reading this Physics in Biology and Medicine, Fourth Edition (Complementary Science) can be the light food in your case because the information inside this book is easy to get by anyone. These books develop itself in the form that is reachable by anyone, yes I mean in the e-book application form. People who think that in publication form make them feel tired even dizzy this book is the answer. So you cannot find any in reading

a guide especially this one. You can find what you are looking for. It should be here for anyone. So , don't miss it! Just read this e-book sort for your better life along with knowledge.
