Statistics for Terrified Biologists Helmut van Emden

"We highly recommend it—not just for statistically terrified biology students and faculty, but also for those who are occasionally anxious or uncertain. In addition to being a good starting point to learn statistics, it is a useful place to return to refresh your memory." –The Quarterly Review of Biology, March 2009

"During the entire course of my Ph.D. I've been (embarrassingly) looking for a way to teach myself the fundamentals of statistical analysis. At this point in my education, I've come to realize that often times, simply knowing the basics is enough for you to properly apply even the most complex analytical methods. 'Statistics for Terrified Biologists' has been just such a book - it was more than worth the \$40 I spent on it, and while my 'book clubs' aren't meant to be reviews, I highly recommend the book to anyone who's in a similar predicament to my own." –Carlo Artieri's Blog Book Club

The typical biology student is “hardwired” to be wary of any tasks involving the application of mathematics and statistical analyses, but the plain fact is much of biology requires interpretation of experimental data through the use of statistical methods.

This unique textbook aims to demystify statistical formulae for the average biology student. Written in a lively and engaging style, *Statistics for Terrified Biologists* draws on the author’s 30 years of lecturing experience. One of the foremost entomologists of his generation, van Emden has an extensive track record for successfully teaching statistical methods to even the most guarded of biology students.

For the first time basic methods are presented using straightforward, jargon-free language. Students are taught to use simple formulae accurately to interpret what is being measured with each test and statistic, while at the same time learning to recognize overall patterns and guiding principles. Complemented by simple illustrations and useful case studies, this is an ideal statistics resource tool for undergraduate biology and environmental science students who lack confidence in their mathematical abilities.

From reader reviews:

Richard Hunt:

Do you really one of the book lovers? If yes, do you ever feeling doubt when you find yourself in the book store? Try and pick one book that you just dont know the inside because don't ascertain book by its include may doesn't work this is difficult job because you are frightened that the inside maybe not because fantastic as in the outside appear likes. Maybe you answer could be Statistics for Terrified Biologists why because the fantastic cover that make you consider concerning the content will not disappoint a person. The inside or content is usually fantastic as the outside or perhaps cover. Your reading sixth sense will directly guide you to pick up this book.

Scott Lowe:

Are you kind of occupied person, only have 10 or 15 minute in your morning to upgrading your mind ability or thinking skill actually analytical thinking? Then you have problem with the book in comparison with can satisfy your short space of time to read it because all this time you only find guide that need more time to be read. Statistics for Terrified Biologists can be your answer since it can be read by you who have those short time problems.

Jessica Jones:

In this time globalization it is important to someone to acquire information. The information will make someone to understand the condition of the world. The healthiness of the world makes the information better to share. You can find a lot of recommendations to get information example: internet, paper, book, and soon. You will see that now, a lot of publisher which print many kinds of book. The actual book that recommended to your account is Statistics for Terrified Biologists this book consist a lot of the information of the condition of this world now. This specific book was represented so why is the world has grown up. The words styles that writer value to explain it is easy to understand. The writer made some analysis when he makes this book. That is why this book acceptable all of you.

Christina Pena:

As a college student exactly feel bored in order to reading. If their teacher requested them to go to the library or make summary for some book, they are complained. Just small students that has reading's soul or real their pastime. They just do what the trainer want, like asked to go to the library. They go to right now there but nothing reading critically. Any students feel that looking at is not important, boring along with can't see colorful images on there. Yeah, it is for being complicated. Book is very important in your case. As we know that on this period, many ways to get whatever we really wish for. Likewise word says, many ways to reach Chinese's country. So , this Statistics for Terrified Biologists can make you truly feel more interested to read.
